1. Narasi Proses Bisnis

Memelihara hewan peliharaan merupakan sebuah tanggung jawab yang terkenal di berbagai belahan dunia. Hewan peliharaan membawa kesenangan, kedamaian, dan kasih sayang kepada pemilik hewan peliharaan. Di Indonesia sendiri beberapa tahun belakangan ini, terdapat peningkatan kepemilikan hewan oleh masyarakat Indonesia. Menurut survei yang dilakukan oleh Rakuten Insight Center pada tahun 2022, dari 10.442 responden, diketahui bahwa 67% dari responden memiliki hewan peliharaan. Angka ini menunjukkan bahwa sebagian besar masyarakat Indonesia secara aktif memiliki dan menjaga hewan peliharaan. Namun, peningkatan jumlah pemilik hewan tidak disertai dengan peningkatan akses terhadap wawasan dan fasilitas layanan terkait kesehatan hewan peliharaan.

Sebuah riset yang dilakukan oleh Royal Canin Indonesia pada tahun 2022 menunjukkan bahwa hanya 29,5% hewan peliharaan di Indonesia yang pernah mengunjungi dokter hewan. Angka tersebut menunjukkan sebuah kesenjangan antara tingginya kepemilikan hewan dengan rendahnya angka hewan peliharaan yang mendapatkan layanan kesehatan dasar. Kesenjangan tersebut disebabkan oleh karena rendahnya kesadaran dan sempitnya wawasan pemilik hewan di Indonesia akan pentingnya layanan kesehatan hewan peliharaan. Tidak sedikit masyarakat yang berpikir bahwa hewan peliharaan tidak perlu dibawa ke dokter hewan jika tidak sakit. Tentu, ini bukan menjadi penyebab satu-satunya. Masih ada masalah lain seperti keterbatasan waktu dan rendahnya akses terhadap fasilitas layanan kesehatan hewan.

Sebagai jawaban untuk masalah tersebut, penulis menghadirkan Pawsure, sebuah aplikasi berbasis mobile yang menyediakan akses terhadap layanan kesehatan hewan secara digital. Pawsure menyediakan berbagai jenis layanan kesehatan termasuk konsultasi secara daring, pembuatan janji temu baik kunjungan ke klinik maupun ke rumah, pencatatan riwayat kesehatan hewan peliharaan, pembelian obat secara *online*, dan juga ulasan transparan bagi dokter.

Saat pertama kali pengguna masuk ke aplikasi Pawsure, pengguna akan diarahkan ke menu utama pertama bernama menu *Home*. Di menu ini, pengguna dapat mengakses menu *Drug Store* yang menampilkan berbagai jenis obat hewan yang disediakan oleh toko hewan atau klinik yang menjadi mitra Pawsure. Untuk membeli obat, pengguna pertama-tama dapat memilih sebuah produk obat dan aplikasi akan menampilkan detail obat. Pengguna kemudian dapat menambahkan obat ke keranjang dengan mengisi jumlah yang ingin ditambahkan dan menekan tombol "*Add to Cart*". Pengguna dapat membeli lebih dari satu jenis produk obat

dalam satu transaksi. Setelah selesai menambahkan semua produk ke keranjang, pengguna dapat menekan icon *cart* dan melakukan pembayaran.

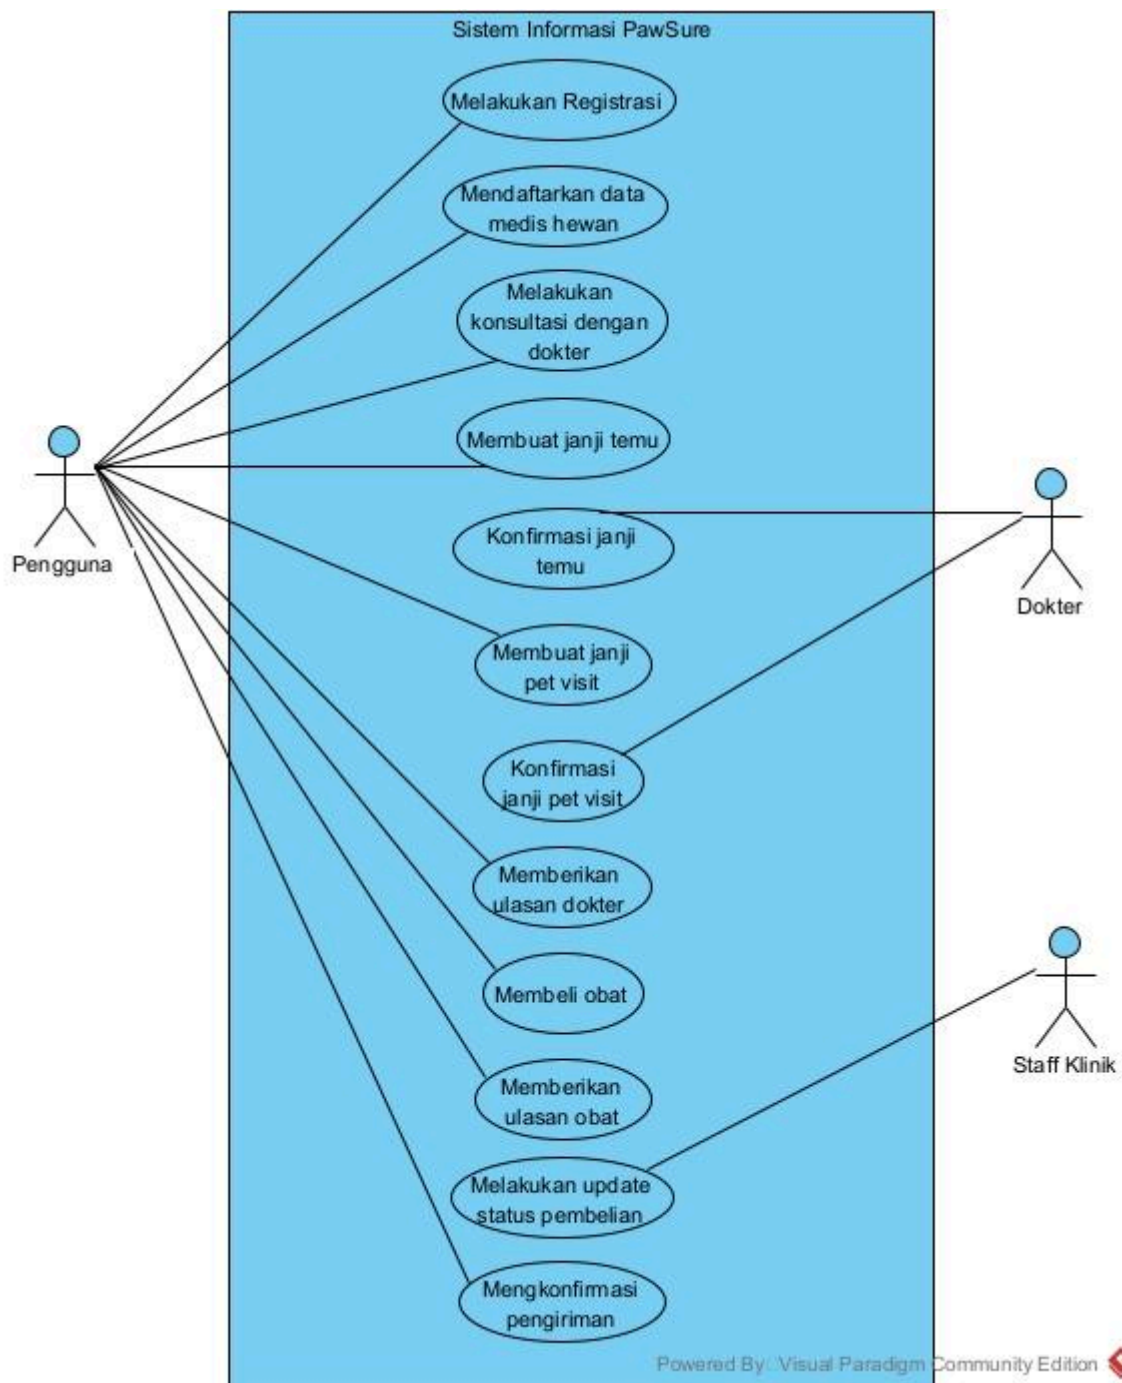

Menu utama yang selanjutnya dari Pawsure adalah menu *Consultation* yang menampilkan daftar semua dokter yang menyediakan layanan konsultasi *online*. Ketika memilih seorang dokter, pengguna dapat melihat secara rinci informasi tentang dokter meliputi spesialisasi, pengalaman, dan ulasan yang dimiliki. Setelah itu pengguna dapat melakukan konsultasi dengan memilih hewan yang ingin dikonsultasikan dan melakukan pembayaran terlebih dahulu. Pawsure menyediakan berbagai metode pembayaran *e-wallet* berupa ShopeePay, GoPay, dan Dana. Setelah pembayaran berhasil, pengguna dapat langsung berinteraksi dengan dokter hewan. Di akhir sesi konsultasi, pengguna akan mendapatkan diagnosis dokter dan bahkan resep dokter yang bisa ditebus di *e-pharmacy* Pawsure atau apotek. Dengan adanya konsultasi *online*, pemilik hewan tidak perlu pergi ke klinik untuk berbicara dengan dokter.

Selain menu *Consultation*, terdapat menu *Appointment* yang menampilkan daftar dokter yang dapat dibuatkan janji temu. Serupa dengan melakukan konsultasi, pengguna dapat memilih dokter yang diinginkan. Namun sebelum dapat membuat janji, pengguna harus memilih antara membuat janji temu atau janji *pet visit*, yaitu janji kunjungan dokter ke rumah. Seterusnya, pengguna dapat memilih hewan peliharaan yang ingin dibuatkan janji, dan juga melakukan pembayaran. Setelah itu, sistem akan menyimpan informasi janji yang dibuat oleh pengguna.

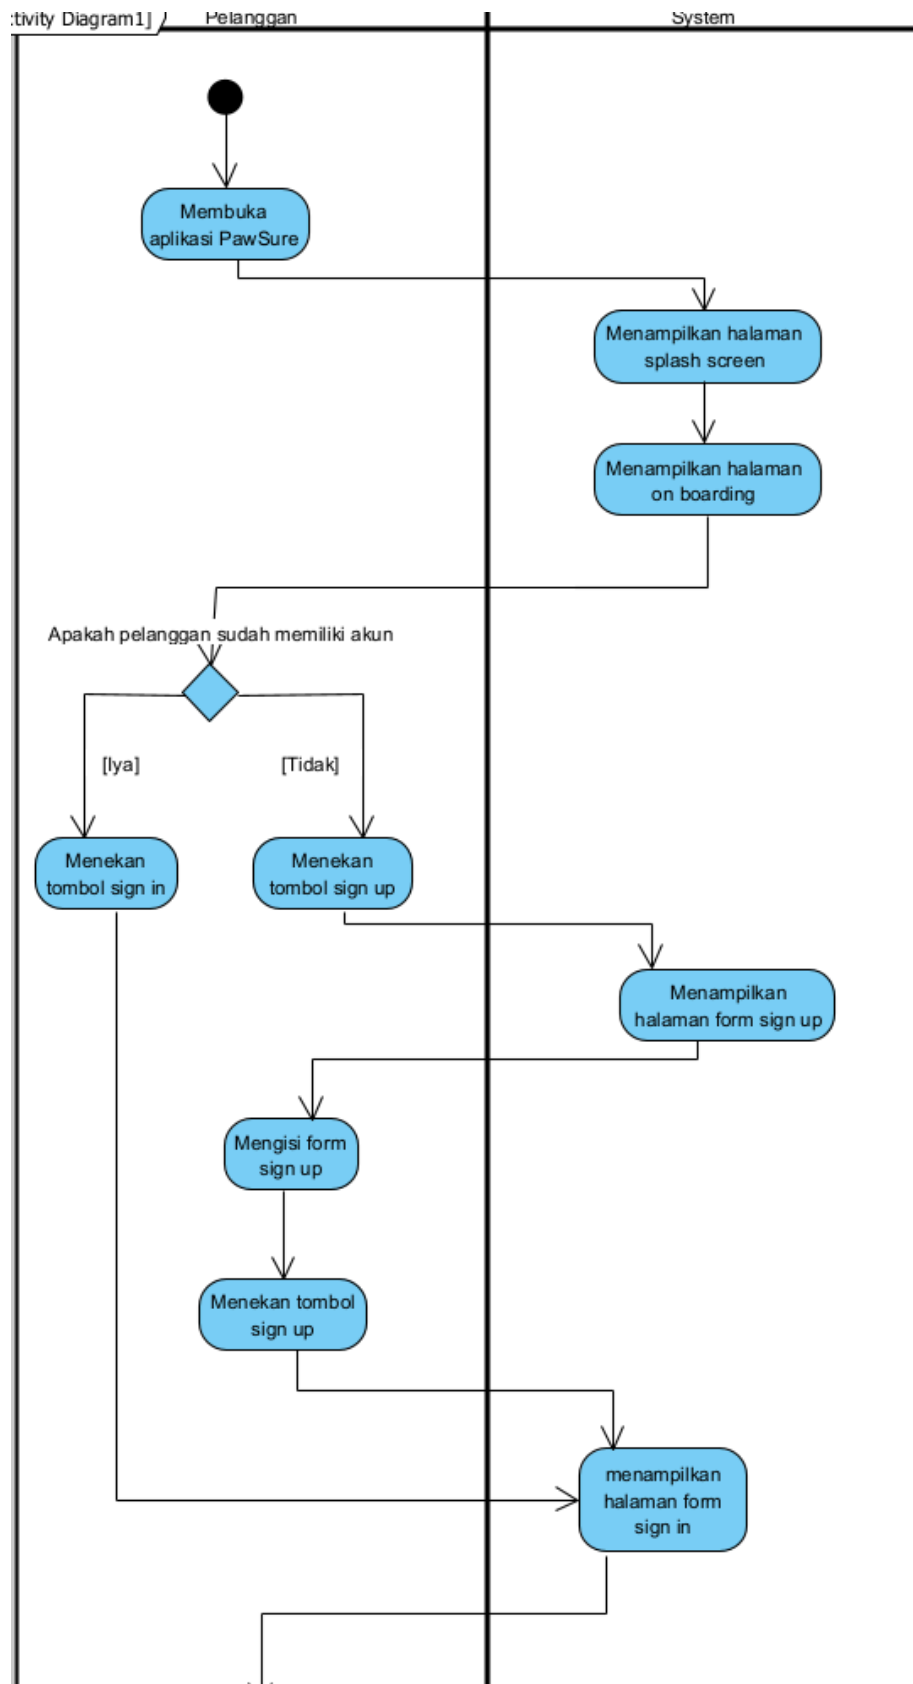

Menu berikutnya adalah *Transaction* yang menampilkan semua transaksi yang sedang dan pernah dilakukan oleh pengguna. Pengguna juga dapat memfilter transaksi berdasarkan jenis transaksi meliputi pembelian obat, konsultasi, *appointment*, atau *pet visit*. Untuk transaksi yang sudah selesai, pengguna dapat memberikan ulasan bila diinginkan. Sedangkan untuk menu terakhir adalah menu *Profile* yang menampilkan data diri pengguna dan juga data kesehatan hewan peliharaan yang dimiliki. Dalam menu ini, pengguna dapat mendaftarkan hewan peliharaannya dengan mengisi data seperti nama hewan, jenis hewan, ras, jenis kelamin, dan berat badan. Pengguna juga dapat melihat hewan peliharaan yang sudah didaftarkan lengkap dengan riwayat kesehatan seperti riwayat vaksinasi dan berobat.
